 - COUPLING DEVICE- HRG6.6K
 - CURRENT TRANSFORMER – CTN100A CURRENT SETTING 1- 100 A
- (FOR 110 V AC TO 230 V AC External adapter will be supply)

APPLICATION :

THIS RELAY IS SUITABLE FOR 6.6 KV, 100 A NGR SYSTEM

GENERAL DETAILS :

The SYNACT Monitor Relay is a combination neutral grounding resistor (NGR) monitor and ground fault relay. In distribution systems employing resistance grounding the SYNACT Monitor Relay protects against ground faults .

The SYNACT Monitor Relay measures the current through the NGR, the transformer neutral-to-ground voltage and the checking continuity of Earth PIT & Transformer neutral cable though pulse. The relay compares the measured values against the field settings of the relay and provides relay outputs and LED display indications when an abnormal condition is detected.
